

Motorsport Next Steps (Level 2)

Course Description

This is the business end of high speed driving. Once you have refined the skills at slow speeds, you must now apply these skills at high speed on a race track. You will be completing fast laps during this training whilst we also work on other techniques. The day starts with a revision of the foundations set in Level 1; seating, steering, gears, balance and braking. The program then increases in difficulty as you improve, slowly adding more to your skill set. Some of these skills are quite technical, however once you understand balance, safe limits and your car control is good, we move into correction techniques.

The Motorsport Level 2 program is a thrilling day with plenty of learning and time to practice your new skills. Only scheduled a few times a year, this exciting program includes in vehicle instruction with accredited trainers.

Course content

- Adapting the seat and steering to higher speeds
