

PMASUP236

Operate vehicles in the field

Course Description:

This program is designed to develop preventative 4WD skills by aligning techniques to Worlds Best Practice. Our Instructors train and then assess each participant to a required standard of compliance with a client's company driving and motor vehicle policies to identify competency and capability. This program develops the attributes and handling characteristics of a typical 4 Wheel Drive in accordance with specific regulations. We formulate driving techniques to safely operate a 4WD on sealed and unsealed road surfaces and various terrain on land transportation activities within field operations. Another elements of the practical training includes how to safely operate a 4 Wheel Drive in 'off road' conditions and be able to self recover an immobilised vehicle by driver technique or / and with the use of recovery equipment.

Duration:

Day 1 - Self Paced Online Theory / Self directed studies
Day 2 - 8 Hour Practical Session (8.00am - 4.30pm)

Vehicle Requirements:

One registered and road worthy vehicle is required for the day.
